

LAB_ANP_C6339_CLASSES_ StudenID:AF0339439

Assignment 1:

Write a Java program that uses a method to calculate the area of a rectangle and compare them using Relational Operator Steps: ● Create a class Rectangle. ● The Rectangle class should have two attributes length and width of type int. ● Create a constructor that accepts length and width as parameters. ● Area should be calculated as length*area. ● Instantiate two Rectangle classes with random values. ● Compare the areas of the two rectangles using the Relational Operator. ● If the first one is bigger than the second one, print “Rectangle1 > Rectangle2”. ● If the first one is smaller print “Rectangle1 < Rectangle2”. ● Otherwise print “They are equal”.

Program:

```
package javaprograms;
```

```
public class Rectangle {
```

```
    int length, width, area; //data member
```

```
    Rectangle(int l, int w) //constructor
```

```
    {
```

```
        length=l;
```

```
        width=w;
```

```
    }
```

```
    void findarea()
```

```
    {
```

```
        area=length*width;
```

```
    }
```

```
public static void main(String[] args)
```

```
{
```

```
    Rectangle r1, r2;
```

```
    r1= new Rectangle(5,4);
```

```
    r2= new Rectangle(4,5);
```

```
    r1.findarea();
```

```
    r2.findarea(); //if(r1.area>r2.area)
```

```
    /*if(r1.area>r2.area)
```

```
        System.out.println("Rectangle1 > Rectangle2");
```

```
    else if(r1.area<r2.area)
```

```
        System.out.println("Rectnagle1 < Rectangle2");
    else
        System.out.println("They are equal");*/

    String message;
    message = (r1.area>r2.area) ? "Rectnagle1 > Rectangle2" :    (r1.area<r2.area) ? "Rectnagle1
    < Rectangle2" : "They are equal";

    System.out.println(message);

    }

}
```

Output:

The screenshot shows the Eclipse IDE's integrated terminal. The terminal title bar includes tabs for 'ntmarks_su', '@ Javadoc', 'Declaration', 'Console', and 'Terminal'. The 'Terminal' tab is active, displaying the output of a Java application. The output text is: '<terminated> Rectangle [Java Application] C:\Users\yella\.p2\pool\plugins\org.eclipse.ju' followed by a new line and 'They are equal'. The terminal window has a standard toolbar with icons for opening, closing, and refreshing views, and a scroll bar on the right side.

Assignment-2.

Write a Java program that allows the user to create a bank account and perform transactions such as deposit, withdrawal, and balance inquiry. Using a conditional operator (ternary operator), display the message whether minimum balance is maintained or not. Steps: ● Create a class BankAccount ● Add three member variables: String accountHolderName, int accountNumber and int balance; ● Add a constructors using all three members ● Add getters and setters. ● Add method deposit (int), withdraw(int) ● Implement the methods by increasing or decreasing the balance ● In the main method create a bank account ● Withdraw money from this account and/or deposit into this account ● Get the balance ● Create a string variable “status” inside the main method ● Assign values to status as “Minimum Balance Maintained” if balance is above or equal to 5000. Otherwise values of status will be “Minimum Balance not Maintained”. Use conditional operator (ternary operator) to assign the values of the status. ● Display the status

Program:

```
package javaprograms;
```

```
public class BankAccount
```

```
{
```

```
    String accountHolderName;
```

```
    int accountNumber;
```

```
    int balance;
```

```
    //constructor
```

```
    public BankAccount(String accountHolderName, int accountNumber, int  
balance) {
```

```
        super();
```

```
        this.accountHolderName = accountHolderName;
```

```
        this.accountNumber = accountNumber;
```

```
        this.balance = balance;
```

```
    }
```

```
    //getter and setter method
```

```
    public String getAccountHolderName() {
```

```
        return accountHolderName;
```

```
    }
```

```
    public void setAccountHolderName(String accountHolderName) {
```

```
        this.accountHolderName = accountHolderName;
```

```
    }
```

```
    public int getAccountNumber() {
```

```
        return accountNumber;
```

```
    }
```

```
    public void setAccountNumber(int accountNumber) {
```

```
        this.accountNumber = accountNumber;
```

```
    }
```

```
    public int getBalance() {
```

```
        return balance;
```

```
    }
```

```
    public void setBalance(int balance) {
```

```

        this.balance = balance;
    }

    //methods

    public String deposit(int deposit)
    {
        balance=balance+deposit;

        return (balance>=5000 ? "Minimum balance is maintained" :
"Minimum balance is not maintained");
    }

    public String withdraw(int withdraw)
    {
        if(withdraw<=balance)
            balance=balance-withdraw;
        else
            System.out.println("low balnce!!!");

        return (balance>=5000 ? "Minimum balance is maintained" :
"Minimum balance is not maintained");
    }

    public static void main(String[] args)
    {
        BankAccount bank = new BankAccount("UdayKumar",630914, 50000);
        System.out.println("account no : " + bank.getAccountNumber());
        System.out.println("account holder name : " +
bank.getAccountHolderName());
        System.out.println("account balace : " + bank.balance);

        String msg= bank.deposit(10000);
        System.out.println(msg);
        System.out.println("Balance after deposit " + bank.getBalance());
        msg=bank.withdraw(7000);
        System.out.println(msg);
        System.out.println("Balance after withdraw " + bank.getBalance());
    }
}

```

Output:

The screenshot shows the Eclipse IDE's integrated terminal. The terminal title bar indicates the application is 'BankAccount [Java Application]' located at 'C:\Users\yella\.p2\pool\plugins\org.eclipse'. The output text is as follows:

```
<terminated> BankAccount [Java Application] C:\Users\yella\.p2\pool\plugins\org.eclipse
account no : 630914
account holder name : UdayKumar
account balace : 50000
Minimum balance is maintained
Balance after depost 60000
Minimum balance is maintained
Balance after withdraw 53000
```

The terminal window includes standard icons for file operations (copy, paste, save, etc.) and a vertical scrollbar on the right side.
